Dura Rack Pallet Rack

*237,000 sq. ft. manufacturing facility*

Our Company had its start in 1930 and although we have had changes in manufacturing sites, we have a continuous record of manufacturing quality material handling products. During the last 72 years, our goal has been to improve our products and efficiency in manufacturing.

Today we produce products with the use of computer controlled production lines, automatic welding systems and powder coating.

Thank you for your trust. We will work hard to earn your confidence.
- Dura Rack Pallet

DURA RACK, INC.

FRAMES

Teardrop design - most popular industrial standard -offers 2" adjustability for most efficient height usage.

Standard widths to 64" and heights to 300" to cover most storage applications.

Height tensile steel columns and heavy channel bracing soundly welded together result in strong and reliable upright truss.

Boltless design insures ease of assembly and adjustment.

The finish is iron phosphated and is coated with powder coating to insure protection of rack components. Standard colors: dura green - frames, safety orange - beams.
Weight capacities to 35,000 Lbs. Capacities are based on 54" beam spacing.

All rack components designed in accordance with requirements of the Rack Manufacturers Institute and conform to AISC and light gage cold-formed standards.

All frames have footplates welded to the frame posts. Each footplate is 4-1/2" x 3" x 10 GA. and has two (2) 9/16' holes for securing frames to the floor.

LOAD BEAMS

Beams are made of high strength steel, using two-piece construction welded for the strongest beam design.

The beams have heavy duty connector clips with a self-locking safety spring that automatically locks the beam into place. Solid load bearing rivets secure the beams to the frame and the locking action increases as the load increases.

Standard beam lengths are available to 144" long in many load capacities. Meets or exceeds RMI standards.

Steel surfaces receive an iron phosphate coating and then are coated with powder coating safety orange to protect rack components.
